Bimonapp was created to 24/7 monitor plant, fish, animal species and water /soil quality with your cell phone. You can monitor and select variables to track or create your own variables add pictures or comments, gps location, and the date and time. Bimonapp can be used with a sensors or no sensors at all. Tracking is very important to monitoring the optimized health & progress of your species, water or soil quality. Download reports, daily, weekly, monthly, YTD, or even a complete report in a database spreads.

Back-to-the-Roots 3 gal tank

HANNA HI98129 THE NEW COMBO PH TDS CONDUCTIVITY AND TEMPERATURE POKET MULTI-PURPOSE METER

Aquasprouts 10 gal Tank

Husky Aqua tanks with travel bag

Training sessions are priced per hour per person. Group rates are available. Schedule a session by e-mailing Bimonapp@gmail.com
